CONTENTS OF VOLUME 32

Number 1

N. K. Bansal, M. S. Sodha, A. K. Sharma and R. Rakshit	1	A solar passive building for hot arid zones in India
Ram Chandra and M. S. Sodha	11	Testing procedures for solar air heaters: a review
M. F. M. Fahmy and A. M. Labib	35	Exact solution of a model for dynamic behavior of a matrix solar air heater
Chandra Shekhar Sinha and Tara Chandra Kandpal	43	Performance prediction of multivane windmills in India
A. V. Narasimha Rao, T. L. Sitharama Rao and S. Subramanyam	51	Mirror boosters for solar cookers—III
M. Sh. El-Deen Mohamedein and Ismail A. Kholeif	59	Diffusion in a layer of finite depth
H. M. Ali	67	Experimental study on air motion effect inside the solar still on still performance
A. Venkatesh	71	Domestic solar water heater—continuous flow type
S. M. Marty, S. W. Simpson and H. K. Messerle	77	Stability of open-cycle MHD disk generators—I. Linear analysis
S. M. Marty, S. W. Simpson and H. K. Messerle	89	Stability of open-cycle MHD disk generators—II. Non-linear analysis
L. Kornblit	97	Can thermoelectric generators be significantly improved?
Software Survey Section	I	

Number 2

Tara Chandra Kandpal, Bharati Joshi and Chandra Shekhar Sinha	101	Economics of family sized biogas plants in India
C. Choudhury and H. P. Garg	115	Performance prediction of a corrugated cover solar air heater
Motoo Ishikawa, Haruo Yawata and Juro Umoto	123	Dynamical behavior of MHD–steam combined system of pilot plant scale

T. YILMAZ — 133 — Computer simulation of two-phase flow thermo-syphon solar water heating system

G. M. AFETI, N. E. IMIDE and P. O. AIYEDUN — 145 — Experimental investigation of a partially insulated solar water heater with natural circulation

YOSHITAKA INUI, MITSUHIDE KATO, MOTOO ISHIKAWA and JURO UMOTO — 153 — Proposal of new power consolidation-inversion system for Faraday type MHD generator using PWM inverter

M. KELLOW and D. JARRAR — 169 — Design of a solar air-conditioning system for peak electrical load shaving

SHAHAB SOKHANSANJ and GREG J. SCHOENAU — 183 — Evaluation of a solar collector system with thermal storage for preheating ventilation air in farm buildings

RAJESH KUMAR and S. C. KAUSHIK — 191 — Thermodynamic evaluation of a modified aqua–ammonia absorption refrigeration system

Software Survey Section — I

Number 3

S. C. KAUSHIK, S. K. RAO and RAJESH KUMARI — 197 — Dynamic simulation of an aqua–ammonia absorption cooling system with refrigerant storage

WAFIK A. KAMAL — 207 — Solar pond literature analysis

ALI A. BADRAN — 217 — Thermal performance of a cylindrical solar collector

B. A. JUBRAN and M. A. ALSAAD — 223 — Parametric study of a box-type solar cooker

A. AL-TURKI and G. M. ZAKI — 235 — Cooling load response for building walls comprising heat storing and thermal insulating layers

CHIH WU — 249 — Specific power bound of real heat engines

K. K. GOPINATHAN — 255 — Studies on the distribution and variation of radiation intensity

A. CHANDRA and R. PANWAR — 263 — Current conduction through hot insulation walls in MHD channels

W. SMOLEC and A. THOMAS — 269 — Some aspects of Trombe wall heat transfer models

M. HUSSAIN — 279 — Seasonal correlations between global radiation and sunshine duration—a case study for eastern Nigeria

G. N. TIWARI and N. K. DHIMAN — 283 — Performance study of a high temperature distillation system

G. N. TIWARI, CHETNA SUMEGHA and Y. P. YADAV — 293 — Effect of water depth on the transient performance of a double basin solar still

Call for Papers I

Software Survey Section III

Number 4

G. N. TIWARI 303 Thermal evaluation of solarium-cum-passive solar house

NURBAY GÜLTEKİN, TEOMAN AYHAN and KAMİL KAYGUSUZ 311 Heat storage chemical materials which can be used for domestic heating by heat pumps

GREG J. SCHOENAU, ALLAN J. LUMBIS and ROBERT W. BESANT 319 Development and verification of a simulation model for predicting the thermal behavior of attached sunspaces

P. T. TSILINGIRIS 333 The radiation transmission across a salinity gradient

N. D. KAUSHIKA and R. PADMA PRIYA 345 Solar transmittance of honeycomb and parallel slat arrays

A. CHANDRA, G. N. TIWARI, V. K. SRIVASTAVA and Y. P. YADAV 353 Performance evaluation of biogas burners

ANIL V. VIRKAR, NEILL WEBER and ASHOK V. JOSHI 359 Theoretical assessment of an oxygen heat engine: the effect of mass transport limitation

N. M. NAHAR 371 Energy conservation and payback periods of large size solar water heater

NILÜFER EĞRİCAN and SEYHAN UYGUR 375 Minimum entropy generation design method for the heat transfer process in the supercritical region

A. I. KUDISH and A. IANETZ 387 Evaluation of the relative ability of three models, the isotropic, Klucher and Hay, to predict the global radiation on a tilted surface in Beer Sheva, Israel

A. CHANDRA, G. N. TIWARI and Y. P. YADAV 395 Hydrodynamical modelling of a biogas burner

Technical Note
PRABHAKANT and G. N. TIWARI 403 Analytical study of heat exchanger design

Call for Papers I

Software Survey Section III

Number 5

A. AL-KARAGHOULI, I. ABOOD and N. I. AL-HAMDANI 409 The Solar Energy Research Center Building thermal performance evaluation during the summer season

Hameed H. Hashem	419	Thermal–economic analysis of industrial gas turbine cogeneration plant
J. P. Mittal, K. C. Dhawan and C. R. Thyagraj	425	Energy scenario of castor crop under dryland agriculture of Andhra Pradesh
Aghareed M. Tayeb, Mahmoud A. El-Rifai, Yehya A. El-Tawil and Reda M. Abdel-Monem	431	Calculation of optimal controller settings and transient responses of a shell-and-tube heat exchanger
Aghareed M. Tayeb, Mahmoud A. El-Rifai, Yehya A. El-Tawil and Reda M. Abdel-Monem	439	A new dynamic model for a shell-and-tube heat exchanger
Neeta Sharma and Giuseppe Pellizzi	447	Anaerobic biotechnology and developing countries—I. Technical status
Neeta Sharma and Giuseppe Pellizzi	471	Anaerobic biotechnology and developing countries—II. Benefits and economic considerations
A. M. Tayeb, I. A. Ashour and N. A. Mostafa	491	Modeling as a tool for process control: alcoholic fermentation
H. M. Asfour, A. M. Tayeb and N. A. Mostafa	499	Alcohol production from acid hydrolyzate of Akalona
A. M. Tayeb, H. M. Asfour, I. H. Aly and N. A. Mostafa	505	Optimizing energy production from agrowastes: a case study for the fermentation of Egyptian beet molasses
Software Survey Section	I	

Number 6

M. A. Hamdan, B. A. Jubran and R. M. Rasheed	515	Energy conservation in traffic
V. Richterová	519	Application of heat pump in rectification decreases energy consumption in the chemical industry
N. A. Al Mahdi and N. S. Al Baharna	529	A fast non-iterative method for the evaluation of the thermal response of wall elements
S. John, N. V. Shanmugam, E. Vidyasagaran, M. Raghavan, P. Ramaiah and C. E. Sooriamoorthy	537	Studies on a new combined concentrating oven type solar cooker
H. P. Garg, R. K. Agarwal and Ashok Kumar Bhargava	543	The effect of plane booster reflectors on the performance of a solar air heater with solar cells suitable for a solar dryer

R. K. JHA, G. N. TIWARI, H. P. GARG and Z. H. ZAIDI — 555 — Thermal evaluation of a "Winter House"

A. CHAKRAVERTY and S. KALEEMULLAH — 565 — Conversion of rice husk into amorphous silica and combustible gas

S. K. SINGH and G. N. TIWARI — 571 — Analytical expression for thermal efficiency of a passive solar still

N. J. RABADI, M. A. ALSAAD and A. ALZU'BI — 577 — The potential and strategies for demand-side management within the industrial sector in Jordan—I

N. J. RABADI, M. M. AL-NASR and M. A. HIJAZI — 585 — The potential and strategies for demand-side management within the industrial sector in Jordan—II

Technical Note

G. N. TIWARI and KAILASH THAKUR — 595 — An analytical expression for efficiency of solar still

Software Survey Section — I
